2026 TREND — IMPROVEMENT

Across all 9 institutes, Jan–Apr 2026 lag avg dropped 78%. UBO: 24.3d→1.2d. UIS: 12.1d→1.3d. IBE: 9.0d→0.7d. Process awareness growing.

Proposed Month-End Close Schedule vs Current State · T030H Configuration Defects · SM36 Automation Path

Month-End Close Calendar — Current State vs Target (Automated)

TIMING	ACTIVITY	CURRENT STATE	TARGET STATE (AUTOMATED)
Day 1 (New month opens)	REVERSE prior month FX SAPF100 reversal variant BUDAT = 1st of month	✗ Manual FBB1 (program-triggered interactively) Lag: 0–40 days UNES J LA: avg 11.8d late No enforcement, no alert	✓ SM36 Job: SAPF100_REV_{BUKRS} Schedule: 06:00 AM day 1 JOBATCH user (same as SAPF124) 9 jobs total · zero lag
Day 25-28 (Last biz days)	REVALUE open FX positions SAPF100 valuation variant BUDAT = last day of month	✗ Interactive F.05 run (no background job) Lag: 0–62 days (2025) ICTP missed July + November UBO avg 24.3d late (2025)	✓ SM36 Job: SAPF100_REVAL_{BUKRS} Schedule: last business day 23:00 9 jobs total · per-BUKRS variants 2026 trend: avg lag <2d
Day 28-31 (Pre-close gate)	FX SIGN-OFF GATE Controller confirms revaluation complete before OB52 lock	✗ Does not exist Period locks without FX check ICTP Jul+Nov gaps undetected until data mining in S#078	✓ Controller sign-off required Verify: BKPF docs exist for period Job log = sign-off evidence Before OB52 period lock

T030H Configuration Defects — OBA1 / KDF

200	T030H rows with empty LSBEW/LHBEW/LKORR F.05 skips these HKONTs silently — FX exposure not valued
383	T030H rows with blocked LKORR account 290 distinct blocked accounts used as balance-sheet adjustment target
17	Active HKONTs with blocked LKORR "Account XXXX is blocked for posting" error at F.05 runtime
278	HKONTs that are themselves blocked F.05 skips before LKORR lookup — no error, silent exclusion
Session trigger error: "Account 1109574 UNES is blocked for posting" → HKONT 0001010574 (active CLP bank) has LKORR → 0001109574 (CLOSED Banco de Chile CLP, XSPEB=X)	

Automation Roadmap — Prioritized

	Create SM36 jobs for SAPF100 · 9 BUKRS × 2 variants JOBATCH + per-BUKRS variants (reval last biz day 23:00 + reversal day-1 06:00) Eliminates ALL manual lag, ALL missed months, ALL backup gaps at once.	HIGH
	Fix T030H LKORR — 17 active HKONTs (OBA1 → KDF) Update blocked LKORR pointers to valid accounts or clear. Stops "Account XXXX blocked" runtime errors at next F.05 run.	HIGH
	Assign backup users: ICTP (M_VENUTI) and UBO (P_TUCKER) Treasury controller to assign + train secondary users. Without SM36 jobs, absence = missed month (proven Jul+Nov 2025).	HIGH
	Add FX sign-off gate before OB52 period lock Formal checklist gate: FX docs exist for period before close is allowed. SM36 job log becomes the sign-off evidence automatically.	MED
	Extract VARI/VARID to Gold DB · audit F.05 variant GL coverage Currently KU-2026-070-02: cannot verify all FX-exposed accounts are in scope. One-time extraction task for next agent session.	MED
	Investigate MGIE P_ARORA mid-month posting pattern Some entries predate month-end (negative lag). Intentional interim practice or process deviation? Interview + document.	LOW
